*Is your current method of online/off-line management, ordering, tracking, and delivery of products and services rigid, cumbersome, inefficient, frustrating and or non-existent? Then do something about it now; the industrial age is over. Bring your business into the information age quick and safe. Don't get left behind!*

*In 2005, online retail sales grew by \$14 billion dollars over 2004. From 2006 to 2010, online sales are expected to rise from \$95 billion (2006) to \$144 billion through 2010; with men and women ages 18-49 driving the market. But even greater is the positive impact online sales have on driving off-line sales.*

The Evolving Virtual Enterprise (EVE) iPortal's Catalogix Products and Services Catalog Module, and Catalogix Concierge Shopping Valet by X-tier SAE Corporation, provides a business with dual online / off-line sales capability; 24/7. Catalogix is the first and only business adaptive products and services catalog on the market today. Catalogix is capable of providing online customers with product/service selection and ordering, as well as, offline management of inventory.

*Catalogix is adaptive to any product or service, regardless whether items are automobiles, food, pottery, flowers, software, computer hardware, apparel, jewelry, beauty products, pharmaceuticals, electronics, toys, vitamins, brochures, service manuals, books, candles, stoneware, pots and pans, custom services, plants, furniture, cleaners, greeting cards, or digital products. The sky is the limit!*

*The Catalogix Online Products and Services Sales Module is a powerful sales solution which exposes a business' products and services to a local and global market!*

**About X-tier**

Founded in July of 2000, X-tier SAE INC. ("X-TIER") is reshaping an industry that has traditionally ignored small and midmarket organizations. X-tier is a privately held technology products and services firm located in the greater Kansas City Kansas/Missouri Metropolitan area whose certified Systems Architects and Engineers design, construct, implement and integrate custom Web-based technologies for small and medium-sized organizations.

In 2007 X-tier's Systems Architects and Engineers created the company's Countercepts division. Countercepts provides from the ground up security hardened solutions, including EVE™ Intercept™, to all company software engineering efforts. EVE™ Intercept™ is an integral part of the EVE™ Security Architecture and has proven a robust, intelligent, and hardened data/application countermeasures module eight years running.

At X-tier, security is always priority one.
