EVE™ eContingency™ College Campus Edition

July 29th 2008 Earthquake - 5.4 Magnitude Greater Los Angeles-area California Earthquake: "As a parent I was unable to contact my daycare center concerning the safety of my daughter and they could not contact me because the phone lines were totally jammed. It's a sick feeling...not knowing if she was ok."

March 9th 2007 Standoff - Olathe Kansas: "I received a call from my son's Karate school to come and pick him up because someone was running around the shopping complex with a gun. I was called by his mother who was not sure what was going on. SWAT officers were all over the place with weapons drawn when I arrived. It was surreal and parents were arriving confused and in a panic!"

April 16th 2007 Shootings - Blacksburg Virginia, Virginia Tech Review Panel: Seung Hui Cho shoots 49 Virginia Tech students, killing 32 before killing himself. State systems for rapidly deploying trained professional staff to help families get information, crisis intervention, and communication with families did not work or were poorly handled; an emergency operations center at VT could have improved communications. "Lives could have and should have been saved" - Peter Grenier, Attorney.

1996 - 2008 History of School Violence: "Approximately 406 students have been killed or wounded by school shootings" - Infoplease.com, A Timeline of Recent Worldwide School Shootings.

To ignore the probability of a worst case scenario is to fuel the potential of its expansion when the unimaginable becomes reality. Enter X-tier's **EVE™ eContingency™**. **EVE™ eContingency™** can help reduce organizational liability and provide the capability to reduce the loss of life and property in the event of an emergency.

EMERGENCY MANAGEMENT
